

OSHA-10 CONSTRUCTION TRAINING FOR BROADBAND

SEE REVERSE SIDE FOR MORE CLASS DETAILS!

Provide Your Broadband Technicians with OSHA-10 Construction Training for Broadband at No Cost!

The Communications Workers of America (CWA) is offering Broadband-targeted OSHA-10 Construction training taught by CWA OSHA-Authorized Trainers for Construction. The CWA OSHA-authorized trainers work for major telecommunications companies. **Each trainer has many years of field and safety experience in Broadband and related work, so they know the job and the work conditions.**

Every attendee who successfully completes the OSHA-10 Construction class will receive an OSHA-10 card issued by the U.S. Department of Labor, which verifies completion of the class. **Many construction job sites require workers to have OSHA-10 Construction cards to perform work on the site, so an OSHA-10 Construction card can be a necessity.**

Safety First is Good for Workers & for Business

- ✓ OSHA-10 Construction training can **prevent injuries and save lives!**
- ✓ When you invest in safety and health education, your bottom line will benefit as well. **OSHA estimates that for every \$1 you invest in safety training, there is a \$4-\$6 return!**

About the Host of the Training, CWA

The Communications Workers of America (CWA) is the largest communications and media labor union in the United States, representing members in both the private and public sectors. CWA is headquartered in Washington, D.C., with district offices and local union halls across the country.

CWA is proud to be providing the OSHA-10 Construction training for Broadband because we value the importance of safety and health on the job.
